<b>Date</b>	11 Oct 2016	<b>Bulletin Number</b>	<b>SB001</b>
<b>Distribution</b>	All markets; NZL; AUS;		
<b>Bulletin For:</b>	Taege Drill and Airseeder C+/D+ Tyne Housings		
<b>Application:</b>	All Taege 3m & 3.6m Drills, 6m Airseeder		
<b>Description</b>	New tyne housings		

**Information:** The tyne housings have been upgraded to provide a better and more secure fit for the tubes.

The tubes are now flared at the bottom and a corresponding recess has been produced in the C+2/D+2 housings along with longer 'grip' lugs. The combination of the flared tube, housing recess and longer 'grip' lugs ensures that the tube is secure and stayed firmly in place.
