

TILTH GROWS SEED!

This is what we're
all about at Taeges!

Our flexible tyne and Tungsten tips
give you excellent penetration.

Taege Uni Drill

- Simple no frills unit.
- Excellent value with great results.
- Gives excellent penetration in extremely hard conditions.
- Creates outstanding tilth, giving much higher strike rates.
- Contour following ensuring more seed is where you want it to be.
- Less rock and existing grass pull out.
- Simple construction, less moving parts reduces down-time and repair and maintenance costs.
- Ability to drill around corners.
- Live tynes give better trash clearing.

Full complement of optional upgrades available to suit
your individual requirements including

- Small seed inserts
- Taege tyne harrows
- Stainless steel bin
- Tyre rollers

**MORE EFFICIENT.
BETTER YIELD.
MORE CHOICE.
BETTER QUALITY.**

Uni Drills

Computerised sponge metering system is standard on all models which provides fast, easy and accurate calibration without the risk of seed damage.

Very flexible 'S' tynes set on a patented angle combined with Taege boots and hard wearing narrow tungsten faced tips in a vastly different set up to other tynes drills.

Strong, fully welded, hot dipped galvanised frame and brackets which ensures longevity of your investment.
